

Grange Valley

MOVABLE PARTITION SPECIALIST

Corporate Brochure 2023

A man in a yellow high-visibility jacket with 'KIWEAR' on the sleeve is using a blue and black Erbauer power drill to work on a metal frame. The background is blurred, showing a workshop or construction site. An orange banner is overlaid on the left side of the image, and another orange box is on the right side containing text.

About Us

Having recently celebrated its 25-year anniversary, Grange Valley is regarded as the UK's leading movable partition specialist, providing turnkey solutions to architects and contractors seeking the highest product and service standards available.

With UK manufacturing facilities and nationwide in-house installation teams, We the capability to provide high-end specification solutions, at highly competitive price points.

The team has been nominated for innovation awards and within the movable partition sector, Grange Valleys excellence and expertise is second-to-none.

Design, manufacturing and installation are meticulously managed for every client project, throughout the customer journey and, a wide range of products and finishes are available, together with fully bespoke capabilities, for architectural projects demanding something entirely unique.

Architectural clients appreciate the wealth of knowledge and approved CPD training available and through working together in partnership, we strive to set new standards in the design and installation of movable partitions.

After project completion, every project includes a post-installation staff briefing and the reassurance of a comprehensive manufacturer warranty, product support and maintenance service, delivered by experienced engineers.

MOVABLE PARTITION SPECIALIST

Bespoke Craftsmanship

Through buying directly from the manufacturer, customers can easily access expert knowledge and advice whilst unlocking high-specification products at factory pricing.

Bespoke craftsmanship

The design and manufacturing teams pride themselves on delivering innovation and genuine British craftsmanship. Each panel is constructed and finished at the factory premises and treated with dedication and care throughout the build process.

Grange Valley continues to deliver attention to detail during installation, training and aftercare, achieving excellence at every stage, like only a true bespoke manufacturer can do.

Clients

Excellence means that it is very often the preferred supplier to architects and contractors, with clients including names like The NHS, BNFL and Shell, to name just a few.

MOVABLE PARTITION SPECIALIST

A vertical sliding folding partition, the Teachwall 200, is shown in a partially open position on the left side of the frame. The partition has a perforated metal texture and visible hinges. Through the opening, a dining room is visible, featuring a round table with a red tablecloth, several wooden chairs with red upholstered seats, and a large window in the background looking out onto a green landscape. An orange text box is overlaid on the upper right portion of the image.

Teachwall 200

Teachwall 200 is a highly versatile sliding folding partition, for flagship installations, where quality, value and style are paramount.

With an intelligent sliding wall system and a prestigious range of finishes, the 200 Series can be manufactured to specification accurately and quickly. Average installations take one day, resulting in minimum on-site disruption. The highly respected, best-in-class 200 Series is renowned for its smooth and efficient performance. With a maximum height of 3.5 metres and an acoustic rating of 35-49 decibels. Teachwall 200 is highly respected by architects, specifiers and builders. A wide range of configurations are available to order, including full height pass doors as standard.

TEACHWALL 200 UNIQUE BENEFITS & SPECIFICATIONS

Track & Roller: Top Hung option with no floor track
Powder coated aluminium head track to RAL 9010 as standard with integral ceiling angle.

Floor: Supported with top guide rail - SAA floor track directly to the top of finish floor.

Floor track: Adjustable "wings" allowing flexibility in finishing to floor.

Locks: Face operated espagnolette bolt locks

Colour range: Standard range consisting of 8 colours or to bespoke specification.

Acoustic rating: manufactured up to 49 decibels.

Stacking: Single Wing or Bi-parting options.

Single Wing - end folding & centre folding available. Operate from left-to-right or right-to-left with the lead panel as pass door. Bi-Parting - eccentric folding available, half can stack to left, half to the right with double pass doors in the centre. Centre Fold - roller position in centre of panel, therefore stacked back in open position, 50% to the left and 50% to the right.

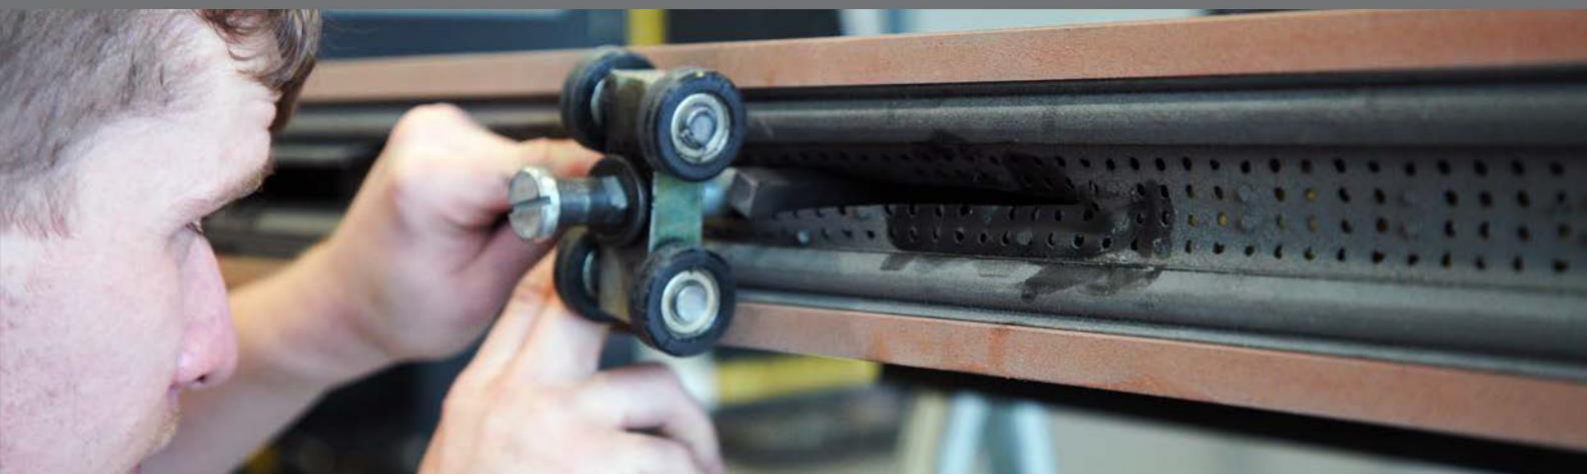

GV can also provide NBS
